如何制止盗版软件 Section VI Writing ( 15 points ) With more and more people having computers, CDs, VCDs or even DVDs have become common things in our life. As some software programs have begun to enter a big market, some people tried to make pirated software for profits and the pirated software has affected the market already. The reasons why pirated software has run wild are as follows. First, there is a huge profit behind it. Each pirated disc will produce 200% net profit. Second, there is no strict law to control the production and distribution of pirated software. That last reason is that education or publicity has fallen behind. People are not aware of the harm which pirated software would bring to the market and thus they would like to become the purchaser of such kind of software. In my opinion, our government should take strong action. To begin with, a law has to be worked out, and those who produce or sell pirated software should be severely punished. Only in this way, will the matter be brought under control. ( 172w ) 100Test 下载频道
