Before e-banking, checking an account balance required the customer to either go to customer service or the teller. Now there are many methods available? ATMs have become an essential part of our lives, because they allow us to check balances, deposit, withdraw and transfer money. Telephone banking allows customers to perform electronic funds transfer transactions (also known as EFT), check balances and pay bills? Mobile banking has nearly the same functionality as telephone banking, except that information is relayed by Short Message Service or SMS, however, paying bills by mobile banking isnt practical. Internet banking on the other hand gives access to a broader range of services. These services include changing account details like address, and password, EFT, arranging bill payments or direct debits, and performing account inquiries. 来源
