作题目 Title：THE “PROJECT HOPE” Outline：1. Present

situation 2. Necessity of the project 3. My suggestion 参考范文

：Education plays a very significant role in the modernization of our

country. There are , however , still a large number of school-agers

in remote and isolated rural areas who cant afford to go to school

because of their financial predicament. This is a very serious problem

which needs to be resolved as soon as possible. Thus , the Chinese authorities have worked out a plan to assist them financially , which is called “ Project Hope ” 。 This project , I do believe , is of most importance and necessity. To begin with , as a developing country , China is unlikely to inject a huge amount of money in education at present. So education has to turn to the general public to find its way out. Secondly , with the financial assistance of the general public , many of the poor children who have 0dropped out of school can go back to go on with their schooling. This will , in turn , contribute a great deal to the expansion of the rural economy in our remote and isolated rural areas. Apparently , the Project Hope is of profound significance for the modernization of our country. As for me , a university student , my suggestions are as follows. In the first place , our government should encourage more of the public in cities to finance the project. In addition , it is most necessary to set up a special foundation to receive the contributions donated by the public at home and abroad. Last but not least , those in charge of the project are supposed to make sure that the money is directly sent to the families whose children have 0dropped out of school. In short , I am convinced that the project will be fruitful and successful in the long run. (284 words) 100Test 下载频道开通 , 各类考试题目直接下载。详细请访问 www.100test.com
