In my opinion, the improvement of

the woman's social position attributes much to our nation's new policy. 20 years ago, a national department, women Union of China, was set up. It struggled for the woman's right and development. Nowadays, there are more job opportunities for the women ever than before. A big percent of women are competing with their male partners, even for some advanced management positions. I can tell you that two of the most important changes coming from the woman's world. Firstly, in the past, the parents felt very sad and disappointed when they gave birth to a girl. The parents without a boy have nobody to ask for help with their fields. So the life will be hard because of this. But in the recent years, even if they can only have one child, some will prefer to have a girl. In the urban area, this phenomenon has almost been eliminated. Accordingly, in the rural area, people's attitude is experiencing a great change. Secondly, women have obtained more opportunities both in study and job market. They can choose to study in the university and go to work even after their marriage. They are enjoying the equality with their husbands in the family. To sum up, it is obvious that the woman's position has been rising for the past 20 years. people are realizing that women can also hold half of the sky, or even more than that. But as we can see, in some regions, the woman is still not equal to the man. There is still discrimination towards women. I think the government should pay more attention to improve the woman's position and maintain their right by the education and laws. Women themselves should also work hard to enrich their knowledge and improve their capability. By this way, they will finally win the acceptance and

respect from the society. 100Test 下载频道开通，各类考试题目
