Part Writing 范文一 Nowadays, there usually exists a wide selection of electives for college students to choose from. However, students have quite different plans for their future so they always end up learning courses based on their own ideas. Some students may choose to learn a certain course in order to obtain an extra certificate for their job hunting after graduation. Because they assume that some more knowledge could ensure more chances of winning in finding a good job. Others may have their choice made just for fun. They tend to hold the idea that college life could be more colorful if they could widen their knowledge through elective courses. As far as I'm concerned, I'm inclined to choose electives based on both the value of the courses and the interest of my own.

范文二 Nowadays many college students prefer to have electives in their spare time because the courses can offer a variety of skills and abundant knowledge apart from what they learn in the daily courses. There are many factors that may account for it, and the following are the most conspicuous aspects. To start with, many students want to get another degree besides their own, so that they can have more competence when they seek a job. Furthermore, as for me, I don't care about degree or job, I just want to obtain some necessary skills to make my college life worthwhile. What I'm concerned most is how to own more skills that may be necessary for my future. Finally,

some students want to learn anything that is different from what they are learning now. The science students, for example, want to know about Shakespeare while the art students want to tell how a vehicle works and how to deal with it when it breaks down. So, they can all get what they think is useful to their college life. On the whole, the phenomenon is one of the results of multi-demand of the employment market. There is still a long way for us to improve the elective itself, but as a student myself, I find it rewarding and interesting. 100Test 下载频道开通，各类考试题目直接下载。详细请访问 [www.100test.com](http://www.100test.com)
